**863 Engineers Representing 49 of the 50 Continental United States  
Granted Certification**

Chicago, IL -November 2, 2005. [The Structural Engineers Certification Board \(SECB\)](http://www.secertboard.org) has completed the second round of certifications in the practice of Structural Engineering. 863 Structural Engineers are now certified in the practice of structural engineering through the SECB.

With the exception of Alaska, all 50 continental states, as well as Puerto Rico and the U.S. Virgin Islands, are now represented through those granted certification. The mission of the SECB is being recognized across the country as proponents continue to spread the word. The states with the greatest representation are California, with over 160 certified structural engineers, Florida with over 80, New York totaling over 50 and Massachusetts with nearly 50 certificant.

The next round of review for the Structural Engineering Certification Board will be in February, 2006 for March, 2006 certification.

For more information on SECB, please visit [www.secertboard.org](http://www.secertboard.org).
